PROFESSIONAL EXPERIENCE

AT&T – Atlanta, GA

07/2025 – Present

AI Product Manager - AI Transformation and Enablement

- Identified AI automation opportunities across **11 consumer capabilities and 64 teams** by analyzing end-to-end operational workflows supporting a **\$175M transformation portfolio**, informing AI product strategy and investment decisions.
- Defined product requirements and roadmap priorities by partnering with business and engineering teams to translate operational challenges into scalable AI solutions.
- Designed an AI-enabled intake and evaluation process that standardized assessment of **several enterprise AI opportunities** and informed roadmap prioritization across business organizations.
- Led product strategy for an enterprise AI-enabled Competitive Intelligence platform that consolidated competitor intelligence, market trends, and operational insights into a unified decision-support platform for executives.
- Managed cross-functional product delivery for a **\$410M billing and plan transformation initiative**, aligning engineering, product, and business teams to deliver enterprise-scale capabilities.
- Established quality metrics and reporting across billing and customer systems, reducing reporting time by **75%** and enabling faster issue resolution.
- Influenced executive roadmap decisions by developing automated dashboards that consolidated cross-program insights and enabled data-driven prioritization across business organizations.
- Developed a self-service analytics product using **Quickbase, SQL, Python, and Power BI**, enabling non-technical users to generate operational insights while reducing reliance on manual reporting.

University of Massachusetts, Amherst – Amherst, MA

05/2023 – Present

Research Assistant (Part-Time) - AI in Education

- Published *Personalized Paths to Mastery: Real-Time Adaptive Feedback for Student Engagement in Discrete Mathematics* and presented research at the AAAI 2025 AI4EDU Workshop.
- Led an Honors Thesis, "The Impact of Reusable Learning Objects", evaluating educator and student perceptions of AI in Education, receiving top departmental recognition.
- Developed a Python prototype, conducted usability studies with **51 participants**, and incorporated feedback from educators and students across **seven universities** into iterative product improvements.

TJX Companies – Framingham, MA

05/2024 – 06/2025

Software Engineer - Cybersecurity Service Delivery Team

- Deployed **22 REST APIs**, improving system scalability and reducing manual cybersecurity workflows by **30%**.
- Enhanced access request management across **1,000+ applications**, increasing operational efficiency and system reliability.
- Standardized internal engineering workflows through reusable tools and templates adopted across development teams.

Software Engineer Intern - Infrastructure & Operations Team

05/2023 – 08/2023

- Investigated and resolved **2,000+ missing network records**, improving infrastructure data quality and operational visibility.
- Built the company's first Retail Fraud Framework by translating business requirements into scalable technical solutions.

NASA – Lowell, MA

05/2021 – 08/2021

Data Analyst Intern

- Developed statistical models supporting NASA and USDA research on food production for long-duration space missions.
- Created seven PCA visualizations in R to support data-driven decision-making in resource-constrained environments.
- Served as Primary Reviewer and Panel Chair evaluating aerospace and life-sciences research proposals for technical feasibility.

SKILLS

Product & Strategy: AI Product Strategy, Product Discovery, Roadmapping, Cross-Functional Stakeholder Management, User Research, Data-Driven Decision Making, AI Use Case Development

Technical: Python, SQL, JavaScript, TypeScript, C/C++

Tools: Power BI, Quickbase, Jira, Azure, GitHub, Figma, Miro

Methods & Certifications: Agile, Scrum, A/B Testing, Prototyping, UX Research, SAFe 6 Certified (Leading & Implementing)

EDUCATION

University of Massachusetts, Amherst – Amherst, MA

05/2024

Bachelor of Science, Honors Computer Science & Mathematics
